

## Our policy in response to the state of emergency

April 8, 2020  
Global Fund for Education Assistance

In light of the state of emergency declared in seven prefectures including Tokyo on April 7, 2020, we will take the following measures.

Orientation Program planned in Tokyo in May has been canceled while part of the activities will be undertaken in such forms as online video meetings and live streaming with smartphones and tablets. We believe that taking on such challenges could lead to the creation of new leadership opportunities beyond the conventional approach. Further details will be communicated directly with the participants.

For the time being, all staff members will work from home, which may cause delay in responding to inquiries. We thank you for your patience in advance.

Despite the difficulties, we will continue to strive towards our mission, and would be grateful for your continued support and guidance.

END
